

Contents:

- **Definition:** HyperText Transfer Protocol — a set of rules for transferring files (text, images, video, sound) on the Web.
- **Role:** Foundation of any data exchange on the Web.
- **How it works:**
 - Browser (client) sends an HTTP request to a web server.
 - Server responds with requested content (HTML, JSON, etc.).
- **HTTP Methods:**
 - GET (retrieve data), POST (send data), PUT (update data), DELETE (remove data).
- **Status Codes:**
 - 200 (OK), 404 (Not Found), 500 (Server Error).
- **HTTPS:**
 - Secure version of HTTP using SSL/TLS for encryption.
- **Example:**
 - <https://www.example.com/page.html>
