

Planning Your Web Project

- **Importance of Planning:**
Planning helps clarify objectives, target audience, and structure.
- **Steps:**
 1. **Define Goal:** What is the purpose of your website?
 2. **Identify Target Audience:** Who will use it?
 3. **Gather Requirements:** What features are needed (e.g., login, blog, gallery)?
 4. **Research Competitors:** Analyze similar sites for ideas.
 5. **Choose Tools:** Decide on frameworks, languages, hosting, and CMS.
 6. **Create Sitemap:** Visual structure of pages.
- **Deliverables:**
 - Project plan document, sitemap, timeline, and responsibilities.
