

Sketching Your Website Design

- **Definition:** Sketching is the process of creating rough visual layouts before coding.
- **Purpose:** Helps visualize layout, user flow, and content placement.
- **Tools:**
 - Paper and pen, Figma, Adobe XD, Canva, Balsamiq.
- **Elements to Sketch:**
 - Header, navigation, main content, sidebar, footer.
- **Tips:**
 - Keep it simple.
 - Focus on user experience (UX) and accessibility.
 - Use grid systems for balance.
- **Example:**

Sketch a home page showing logo, nav bar, hero image, and call-to-action button.
